SKILLS

- Backend Development
  - Spring Boot, Node.js, Express.js
- Frontend Development
  - React.js, Vue.js, Tailwind CSS, Material UI
- Databases & Cloud
  - MySQL, MongoDB, PostgreSQL
- AI & Integrations
  - Google Gemini API, DeepSeek API
- Tools & Platforms
  - Firebase, Git, Postman, Docker, CI/CD Basics

PROFILE

Final-year Software Engineering student passionate about building innovative software solutions and eager to apply academic knowledge and project experience to real-world challenges. Seeking a software engineering internship where I can contribute to impactful projects while gaining industry experience.

EDUCATION

Bachelor of Engineering in Software Engineering

Mae Fah Luang University, Chiang Rai, Thailand

Expected Graduation: May 2026

PROJECTS

AI-Powered Fitness Analysis & Recommendation Platform

Spring Boot Microservices, RabbitMQ, Keycloak, Google Gemini AI

- Designed and implemented a scalable microservices platform for fitness tracking and personalized AI recommendations.
- Integrated Eureka, API Gateway, Spring Cloud Config, and dedicated databases (MySQL, MongoDB) for modular architecture.
- Leveraged RabbitMQ for event-driven communication and Keycloak for secure authentication.
- Used Google Gemini AI to provide personalized improvement tips.

Github↗

AI-Powered Email Auto Reply Generator

Chrome Extension, Spring Boot, Gemini AI

- Built a Gmail extension with an AI Reply button for professional responses using Google Gemini API.
- Implemented backend workflow for email content extraction and AI reply generation.

Github↗

Attendance Tracking App (Face Recognition & Location Verification)

Spring Boot, React, Python (DeepFace), MySQL, JWT, Railway, Vercel, GCP

- Developed a secure attendance system combining face recognition (DeepFace) and location-based verification (within 200m of office).
- Built a full-stack solution: React frontend (Vercel), Spring Boot backend (Railway), and Python face recognition service (Google Cloud Run).
- Integrated JWT authentication for secure user access and MySQL for persistent storage.
- Implemented employee check-in/out, attendance history, and an admin dashboard for attendance management.
