

# ZARNI TUN

Backend Developer (Java / Spring Boot) | Full-Stack Experience (React, Node.js, Vue)

Bangkok, Thailand | +66945458487 | [zarnn872@gmail.com](mailto:zarnn872@gmail.com) | [portfolio-template-bay-eight.vercel.app](https://portfolio-template-bay-eight.vercel.app) | [linkedin.com/in/zarni-tun-3ab45b332](https://linkedin.com/in/zarni-tun-3ab45b332) | [github.com/zarn-chalamet](https://github.com/zarn-chalamet)

Backend-focused Software Engineer with hands-on experience in Java (Spring Boot) and full-stack development using Node.js, React, and Vue. Experienced in building scalable RESTful APIs, implementing secure authentication (JWT/OAuth2), and developing responsive frontend applications. Strong foundation in microservices architecture, database design, and cloud deployment. Passionate about building reliable systems and contributing to end-to-end software development.

## EXPERIENCE

### Software Developer Intern

Be1 Digital Co., Ltd. — Thailand | January - May 2026

- Developed RESTful API endpoints using Java and Spring Boot for enterprise applications
- Contributed to a government project by implementing business logic and backend services
- Optimized SQL queries and improved database performance
- Integrated Angular frontend with backend APIs
- Debugged issues and enhanced system performance and reliability

**Technologies:** Java, Spring Boot, Angular, SQL, REST API, Git

## PROJECTS

### ATTENDANCE TRACKING SYSTEM (FACE RECOGNITION)

Java, Spring Boot, React, Python, MySQL, JWT, REST API, GCP

- Designed and developed a full-stack attendance system improving attendance accuracy through face recognition and location verification
- Implemented JWT-based authentication and secure RESTful APIs
- Built a microservice-based architecture integrating a Python face recognition service (DeepFace)
- Designed relational database schema and handled data persistence with MySQL
- Deployed services using cloud platforms (Railway, Google Cloud Run, Vercel)

### NARRATEMM – AI-POWERED BURMESE VIDEO RECAP GENERATOR

Java, Spring Boot, React, TypeScript, Python, FFmpeg, Groq Whisper, Gemini AI, JWT

- Built a full-stack video processing app with Spring Boot backend and React/TypeScript frontend
- Designed microservice architecture with a local Python/Flask Edge TTS service for instant voice-over generation
- Solved Myanmar script rendering by building a custom Java AWT Graphics2D subtitle renderer
- Integrated Groq Whisper for transcription and Google Gemini AI for multilingual script generation

### AI POWERED FITNESS ANALYSIS (MICROSERVICES ARCHITECTURE)

Java, Spring Boot, Spring Cloud, Keycloak, RabbitMQ, REST API

- Designed microservices architecture using Spring Boot and Spring Cloud
- Implemented API Gateway, service discovery (Eureka), and centralized config
- Integrated RabbitMQ for async communication
- Used Keycloak for authentication

## EDUCATION

Bachelor of Engineering in Software Engineering, Mae Fah Luang University, Chiang Rai, Thailand

## SKILLS

**Languages:** Java, JavaScript      **Backend:** Spring Boot, REST API, Node.js, Express.js, JWT Auth

**Database:** MySQL, MongoDB, PostgreSQL      **Cloud & Tools:** Git, Postman, Firebase, Google Cloud, Railway

**Frontend:** React.js, Vue.js, Angular, HTML, CSS, Tailwind
